SUMMARY

Web development graduate (AAS, Web Development with AI) building frontend interfaces and backend logic — including a self-directed project evolving from an in-memory API to a containerized PostgreSQL-backed service. Growing into full-stack development through hands-on practice and AI-assisted workflows. Prior marketing experience adds insight into what marketing teams need from the software built for them.

EXPERIENCE

Backend AI Engineering Intern

Fly Rank AI — Remote

Jun 2026 – Present

- Designed and iteratively re-architected a Task Manager API, progressing from in-memory to SQLite to containerized PostgreSQL storage (see Projects)
- Practicing REST API design, database operations, and AI-assisted development independently

Web Development & AI Media Intern

Agilis USA — Remote

May 2026 – Jun 2026 (2 months)

- Built UI components in React for a practice project simulating a real estate social media automation platform — first hands-on project with React, using AI-assisted development throughout
- Contributed to select backend functionality alongside the frontend work

Marketing Management Intern

J Legacy Holding Co. — Remote

Jun 2026 – Present

- Recruit, onboard, and mentor marketing interns; review work and provide feedback
- Support email marketing, SEO activities, and Yelp business page management

Social Media Marketing Intern

J Legacy Holding Co. — Remote

Dec 2025 – May 2026

- Managed content across TikTok, Instagram, and YouTube
- Created SEO-optimized content and supported email marketing campaigns
- Tracked engagement metrics to inform content strategy

PROJECTS

Task Manager API — From In-Memory to Containerized Persistence

Python, FastAPI, SQLite, PostgreSQL, Docker

- Built a CRUD API and progressively evolved its storage layer across three versions — in-memory, SQLite with a repository-pattern architecture, and PostgreSQL running in Docker
- Verified persistence at each stage, including confirming data survives a full container teardown

Dynamic Product Catalog with Shopping Cart

- Interactive JS app using the Fetch API and JSON to render dynamic product listings with reusable HTML template elements and DOM-driven cart functionality

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React (developing), Bootstrap, Responsive UI Design

Backend: PHP, Python, Java, MySQL, PostgreSQL, REST APIs, JSON, API Integration

AI & Automation: ChatGPT, Claude, GitHub Copilot, AI-assisted development workflows, prompt engineering

Platforms & Tools: Git, GitHub, Docker, VS Code, WordPress, WooCommerce, Google Workspace, Buffer, Brevo

Marketing & SEO: SEO, AEO/GEO (learning), content marketing, email marketing, social media marketing

EDUCATION

Associate of Applied Science — Web Development with AI

Highline College — Graduated 2026

Bachelor's Coursework, Chemistry

Kabul University — 2016–2017
